Test Status

Complete

Test Result

Non-Compliant

Started

2024-12-10 16:32:09

Duration

14m 43s

Results List (34/44)

Name	Description	Result
protocol.valid_bacnet	Could not resolve device IP address	Error
protocol.bacnet.version	Device did not respond to BACnet discovery	Feature Not Detected
protocol.valid_modbus	Device did not respond to Modbus connection	Feature Not Detected
security.tls.v1_0_client	Could not resolve device IP address	Error
security.tls.v1_2_server	Could not resolve device IP address	Error
security.tls.v1_2_client	Could not resolve device IP address	Error
security.tls.v1_3_server	Could not resolve device IP address	Error
security.tls.v1_3_client	Could not resolve device IP address	Error
security.services.ftp	No FTP server found	Compliant
security.ssh.version	No SSH server found	Compliant
security.services.telnet	No telnet server found	Compliant

sclera sclera vdms

Results List (34/44)

Name	Description	Result
security.services.smtp	No SMTP server found	Compliant
security.services.http	No HTTP server found	Compliant
security.services.pop	No POP server found	Compliant
security.services.imap	No IMAP server found	Compliant
security.services.snmpv3	No SNMP server found	Compliant
security.services.vnc	No VNC server found	Compliant
security.services.tftp	No TFTP server found	Compliant
ntp.network.ntp_server	No NTP server found	Compliant
connection.port_link	No port errors detected	Compliant
connection.port_speed	Succesfully auto-negotiated speeds above 10 Mbps	Compliant
connection.port_duplex	Succesfully auto-negotiated full duplex	Compliant
connection.switch.arp_inspection	Could not resolve device IP address	Error
connection.switch.dhcp_snooping	Device does not act as a DHCP server	Compliant
connection.dhcp_address	Device responded to leased ip address	Compliant
connection.mac_address	MAC address found: 00:e2:69:40:93:82	Compliant
connection.mac_oui	No OUI Manufacturer found for: 00:e2:69:40:93:82	Non-Compliant
connection.private_address	All subnets are supported	Compliant
connection.shared_address	All subnets are supported	Compliant
connection.dhcp_disconnect	Device received a DHCP lease after disconnect	Compliant
connection.dhcp_disconnect_ip_change	Device received expected IP address after disconnect	Compliant

sclera sclera vdms

Results List (34/44)

Name	Description	Result
connection.single_ip	Device is using a single IP address	Compliant
connection.target_ping	Could not resolve device IP address	Error
connection.ipaddr.ip_change	Device has accepted an IP address change	Compliant
connection.ipaddr.dhcp_failover	Secondary DHCP server lease confirmed active in device	Compliant
connection.ipv6_slaac	Device does not support IPv6 SLAAC	Non-Compliant
connection.ipv6_ping	No IPv6 SLAAC address found. Cannot ping	Non-Compliant
dns.network.hostname_resolution	DNS traffic detected from device	Compliant
dns.network.from_dhcp	No DNS traffic detected from the device	Informational
dns.mdns	MDNS traffic detected from device	Informational
ntp.network.ntp_support	Device has not sent any NTP requests	Non-Compliant
ntp.network.ntp_dhcp	Device has not sent any NTP requests	Feature Not Detected

Non-complaint tests and suggested steps to resolve

1.

Name

connection.mac_oui

Description

No OUI Manufacturer found for: 00:e2:69:40:93:82

Steps to resolve

1. Register the device MAC address with IEEE

2.

Name

connection.ipv6_slaac

Description

Device does not support IPv6 SLAAC

Steps to resolve

1. Install a network manager that supports IPv6
2. Disable DHCPv6

3.

Name

connection.ipv6_ping

Description

No IPv6 SLAAC address found. Cannot ping

Steps to resolve

1. Enable ping response to IPv6 ICMP requests in network manager settings
2. Create a firewall exception to allow ICMPv6 via LAN

4.

Name

ntp.network.ntp_support

Description

Device has not sent any NTP requests

Steps to resolve

1. Set the NTP version to v4 in the NTP client
2. Install an NTP client that supports NTPv4

Device profile

Question		Answer
1.	What type of device is this?	IoT Gateway
2.	Please select the technology this device falls into	Hardware - Monitoring
3.	Does your device process any sensitive information?	Yes
4.	Can all non-essential services be disabled on your device?	Yes
5.	Is there a second IP port on the device?	Yes
6.	Can the second IP port on your device be disabled?	Yes
